

Tempofor® CONTROL

These low crowd barriers are a must for festive and sporting events. They help manage traffic flow and ensure personal safety.

Benefits

Easy installation, handling and storage

- No accessories: their hook-and-eye connection simplifies installation
- The design of the feet makes it possible to manage angles and simplifies storage
- This lightweight barrier can be manoeuvred by a single person thanks to the integrated handle in the middle of the barrier

Guaranteed security

- Thanks to its double locking system, once the barrier suite has been installed, the fence becomes solid and secure, making it impossible to open or lift
- An additional connecting bar between the feet provides rigidity and stability
- In line with regulations, the spacing between bars is less than 110mm, guaranteeing children's safety

Customisation

- A metal nameplate in the middle of the barrier leaves room for customisation of your choice, with event advertising or sponsor stickers, for example
- Different display systems can be installed on the barriers to customise the event
